

## Monday 30<sup>th</sup> of June 2025

**Becoming stormy.** Cloudy spells may affect the sunshine over the south-east of Savoie at the start of the day. Elsewhere, the **morning will be very sunny, before the first cumulus clouds form over the higher ground around midday.** These cumulus clouds then increased in volume as the hours passed. The **skies eventually became threatening in the afternoon.** This instability reaches the inner Alps at the end of the day, then the Jura and the Pre-Alps in the first part of the evening. These thunderstorms will be isolated but sometimes severe (risk of hail, intense rainfall and wind gusts of up to 80-100km/h). The risk of thunderstorms disappears the following night.

*Lowland and valley minimum temperatures: 17/19°C. Max temperatures in plains and valleys: 35/38°C. Iso 0°C: 4500m. Water temperature - Lake Geneva: 24°C.*

## Tuesday 1<sup>st</sup> of July 2025

**Same type of weather.** The **morning will be fully sunny**, then **cumulus clouds will swell over the higher ground in the afternoon.** **Local but sometimes strong thunderstorms** then develop between the end of the day and mid-evening, particularly towards the inner Alps. Light south-westerly wind.

*Lowland and valley minimum temperatures: 17/19°C. Max temperatures in plains and valleys: 35/38°C. Iso 0°C: 4300m. Water temperature - Lake Geneva: 24°C.*

## Wednesday 2<sup>nd</sup> of July 2025

**Still as hot as ever.** The **sky is perfectly blue in the morning.** In the **afternoon, cumulus clouds** budded over the higher ground. As on the previous day, **isolated but sometimes heavy thunderstorms** developed towards the end of the day, especially near the Hautes-Alpes. The following night, this instability ceased. Light south-westerly wind.

*Lowland and valley minimum temperatures: 17/19°C. Max temperatures in plains and valleys: 36/38°C. Iso 0°C: 4200m. Water temperature - Lake Geneva: 24°C.*

## Thursday 3<sup>rd</sup> of July 2025

**Radiant sunshine in the morning, followed by cloudy spells in the afternoon,** alongside a rainstorm. This crossed our mountain ranges from west to east in the evening. Moderate south-westerly wind.

*Lowland and valley minimum temperatures: 18/20°C. Max temperatures in plains and valleys: 34/36°C. Iso 0°C: 4200m. Water temperature - Lake Geneva: 24°C.*

## Trends from Thursday 3<sup>rd</sup> to Saturday 5<sup>th</sup> of July 2025

**Variable. Significantly cooler.**
